

EARTH, ENERGY, EFFICIENCY!

One of the most important challenges facing modern recreational facilities and property managers today is incorporating environmental, labour, and energy-efficient solutions to their day to day operations.

At Jadaco we are please to introduce – **Aquatic Energy Management System (AEMS)**. This four stage system incorporates the aquatic industry’s latest advances, finally allowing aquatic facilities the opportunity to address energy, environmental, and labour issues while adhering to stringent provincial and municipal regulations. In a very short period of time, protecting the environment, decreasing energy and labour costs will provide AEMS end users with substantial peace of mind and significant return on investment realized inside the first budget year.

Jadaco Recreation Management is a service and equipment provider for the recreation fitness and aquatic facilities industry.

Made up of a team of experienced and trained professionals, Jadaco caters its services to best suit the unique needs of each facility. Services include, staffing Recreation Centres, Health Clubs, providing high quality, diverse, recreational programs, maintaining all amenities, and providing sales and service of commercial grade equipment, allows Jadaco to meet any need of the modern recreation facility.

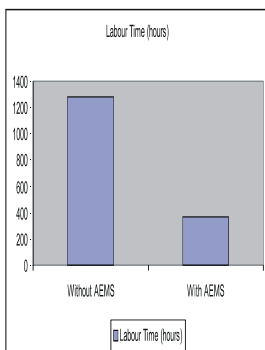

New spotlight on energy savings

More high-rise residences are going green across the greater Toronto area.

“I think the whole industry’s becoming much better aware of what the energy and environmental issues are, and they’re all working towards it,” says Chris Tyrrell, general manager for Toronto Hydro Energy Services.

Toronto Hydro observes buyers will become more informed of how enviro-friendly buildings are becoming – even more so after they’ve seen the financial benefits. “It’s a good thing to see,” he says.

Benefits of A.E.M.S

- Reduces energy
- Labour saving
- Environmentally friendly
- 30-50% reduction in use in sanitizer
- Cost effective
- Reduces heat & water loss by up to 40%

Heatsavr The original LIQUID solar pool cover that saves energy, water & money.

Heatsavr is a transparent “liquid solar blanket” that greatly reduces heat loss. The liquid forms a barrier on the surface of the pool, inhibiting evaporation. Heatsavr has been tested and proven to be completely safe and biodegradable.

Heatsavr is guaranteed to save energy and water in every pool. Energy savings up to 40% can be expected. The reduction of evaporation and humidity in indoor pools also lowers the cost of air conditioning and structural maintenance.

Heatsavr liquid and pump.

TrioPure Ozonator Sanitation that helps save on power & chemical consumption.

The DEL Ozone TrioPure sanitation system revolutionizes the swimming pool industry by combining two proven technologies, salt chlorine & ozone, into one powerful swimming pool sanitizing system. This unique synergistic combination of technologies provides additional benefits to you compared to other systems: increased water quality, low maintenance, inexpensive salt cell replacement cost and 24 hour automatic operation.

TrioPure System

JetMAX Single motor that provides power savings in labour.

At the heart of every JetMAX is the patented JetDrive Propulsion System. This unique valve system enables JetMAX to vacuum dirt and debris into the filter bag and out of the pool while moving around your pool using a single high output pump motor. The Hydroscrub Power Wash System includes a high pressure impeller that forces pressurized water through tubes to the Hydroscrubber nozzles. Sharp streams of water power wash dirt and debris off the pool surface. The result is the world’s fastest, most reliable and lowest maintenance commercial swimming pool cleaner ever produced.

JetMAX Vacuum

Watermatic Simplified automation for commercial pools & spas.

The Watermatic controllers adjust automatically in response to bather load, temperature, organic contamination and any variety of changing conditions. Constant monitoring ensures that the systems add exact doses, avoiding chemical highs and lows, keeping levels at optimum. Automatic, precise dosing means efficient use of chemicals and clean, safe swim-
